Dear Sirs:

On October 18, 1982, we entered into an agreement with United Disposal Division of SCA Services. By your letter of November 6, 1984, you have advised us that you would be performing all of such agreements.

Our agreement with you provides as follows:

" Disposal shall be at the contractor's expense at a site permitted for Special Waste by the State of Illinois. Contractor will obtain and maintain all necessary permits for at least two (2) such permitted sites for filter cake sludge, lime grit, and sewage treatment plant grit."

Within the last month (to be specific, on February 22, 1985 and starting on March 11, 1985 and still continuing), you have no available site. And in addition, since at least February 22, 1985 you have had only one (1) site or less.

We hereby demand that you fully and completely perform all of your duties and obligations under the cited agreement.

Your failure to do so may jeopardize our EPA permits. If penalties or other cost result, we will hold you liable therefore.

000401

Very truly yours,

W. L. DeFer  
Treasurer
